

Being a truck driver and traveling across these United States, it is very important to me to be able to have instant traffic and weather reports for the areas I am in. Yes, local stations may provide these services, but they do not provide INSTANT information. As a XM radio listener, I have paid for this service and I feel that the FCC is telling me what I can and can't purchase and from whom. As a truck driver I have found this service helpful often.
